

Supply Chain Analytics

Assignment 1 — Advanced Business Statistics

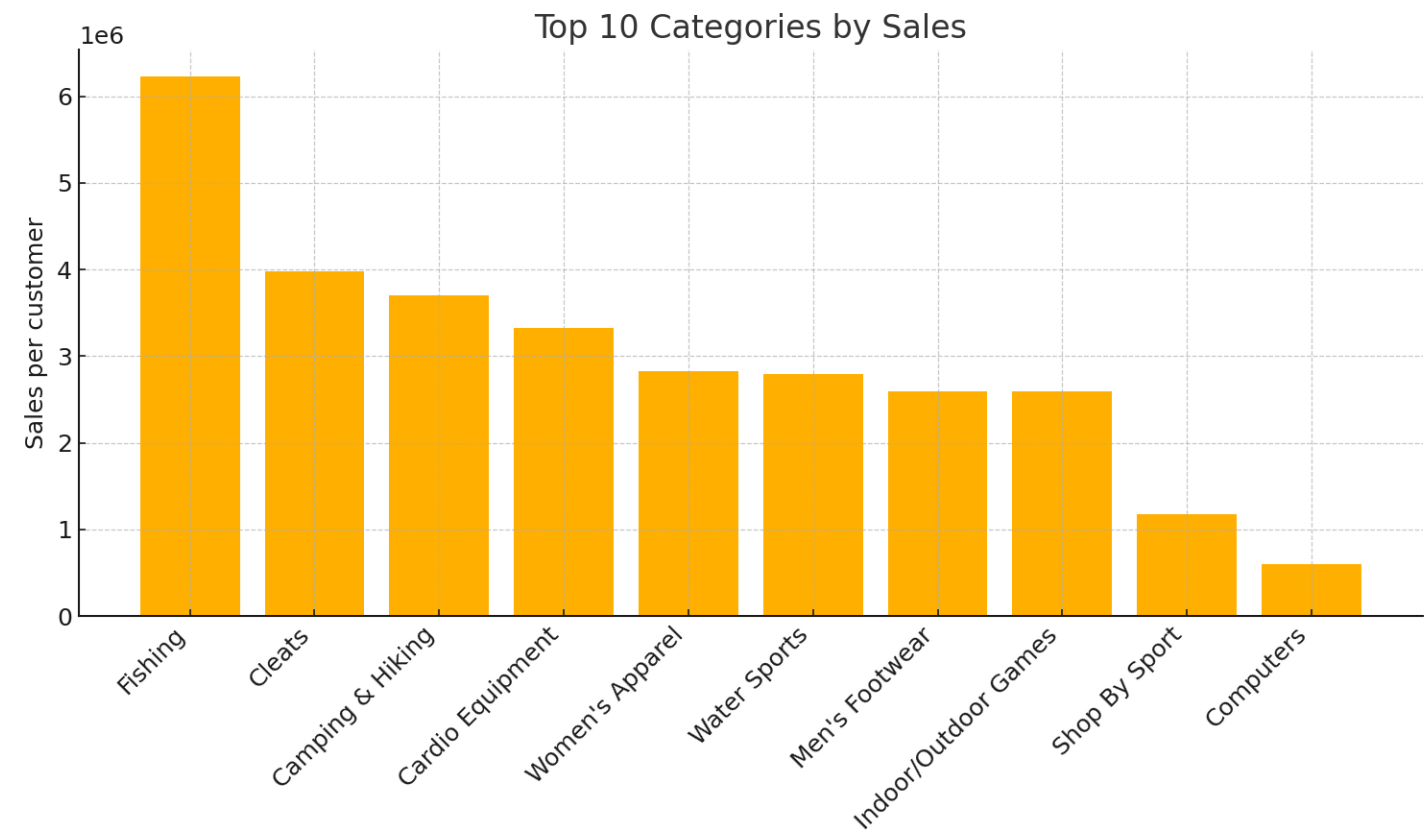

Prepared by: vidhun mohan

Overview

- Dataset: DataCo Supply Chain (~180k rows)
- Deliverables: Streamlit dashboard, report PDF, presentation PDF, GitHub repo
- Goals: revenue drivers, delivery risk, supplier performance, predictive risk

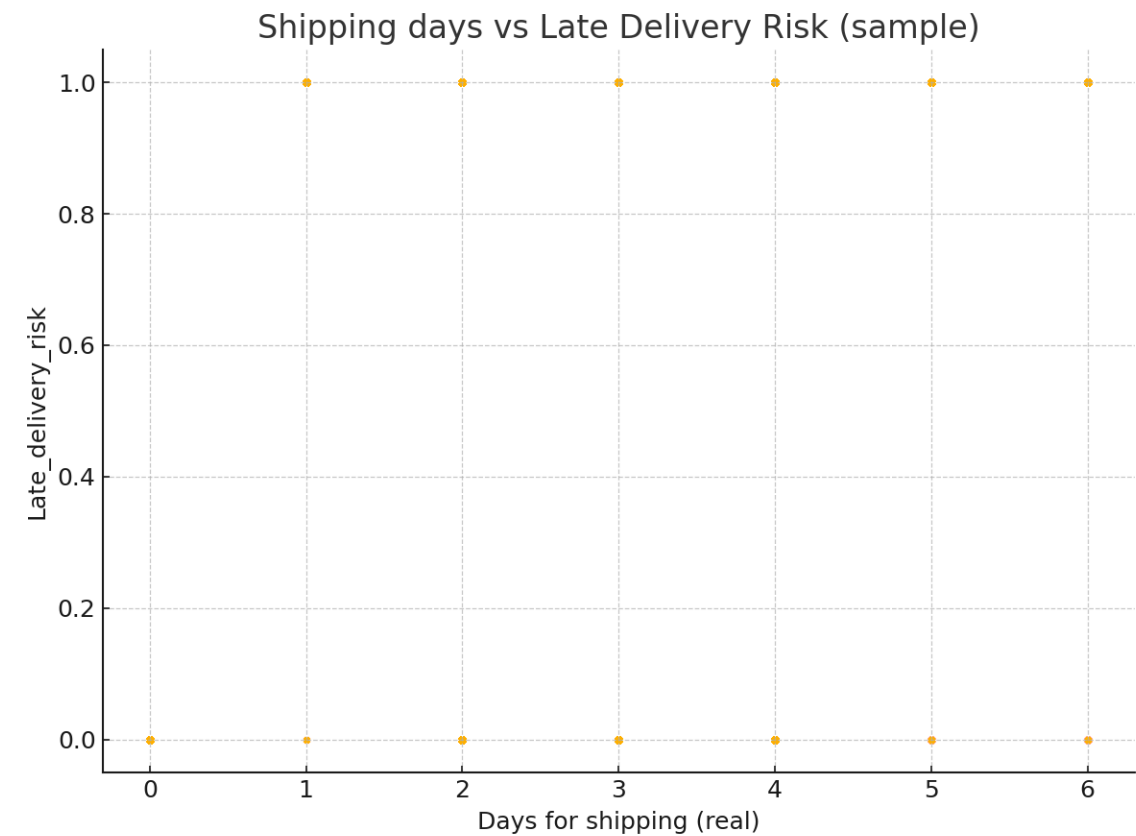

Key Findings

Top categories and revenue drivers

Delivery Risk

Shipping days vs late delivery risk (sample)

Recommendations

- Prioritize high-margin categories for inventory and marketing.
- Implement supplier scorecards and performance contracts.
- Review First Class operational promises and capacity planning.
- Develop production-ready predictive pipeline (SMOTE, XGBoost).
